

Ind. Code Ann. § 20-34-3-9

"Sec. 9. (a) If a student is ill, has a communicable disease, or is infested with parasites, the school principal may send the student home with a note to the student's parent. The note must describe the nature of the illness or infestation and, if appropriate, recommend that the family physician be consulted.

(b) If the parent of a student who is sent home under this section is financially unable to provide the necessary medical care, the medical care shall be provided by a public health facility. If a public health facility is not available, the township trustee or an appropriate governmental agency shall provide the necessary care.

(c) A student who is sent home under this section may be readmitted to the school:

(1) when it is apparent to school officials that the student is no longer ill, no longer has a communicable disease, or is no longer infested with parasites;

(2) upon certification of a physician that the student is no longer ill, no longer has a communicable disease, or is no longer infested with parasites;

(3) upon certification of a physician that the student has a communicable disease, but the disease is not transmissible through normal school contacts; or

(4) upon certification of a Christian Science practitioner, who is listed in The Christian Science Journal, that based on the practitioner's observation the student apparently is no longer ill, no longer has a communicable disease, or is no longer infested with parasites."

Ind. Code Ann. § 16-20-1-24

"Sec. 24. (a) Local health officers may order schools and churches closed and forbid public gatherings when considered necessary to prevent and stop epidemics.

(b) An individual who takes action under this section shall comply with state laws and rules."

Ind. Code Ann. § 16-41-9-3

"Sec. 3. (a) The local health officer may exclude from school a student who has a dangerous communicable disease that:

(1) is transmissible through normal school contacts; and

(2) poses a substantial threat to the health and safety of the school community.

(b) If the local health officer subsequently determines that a student who has been excluded from school under subsection (a) does not have a dangerous communicable disease that:

(1) is transmissible through normal school contacts; and

(2) poses a substantial threat to the health and safety of the school community; the local health officer shall issue a certificate of health to admit or readmit the student to school.

(c) A person who objects to the determination made by the local health officer under this section may appeal to the executive board of the state department, which is the ultimate authority. IC 4-21.5 applies to proceedings under this section."

Executive Order 21-27

9. No Limitation on Authority

Nothing in this Executive Order shall, in any way, alter or modify any existing legal authority allowing the State, any local health department, or any other proper entity from ordering: (a) any quarantine or isolation that may require an individual to remain inside a particular residential property or medical facility for a limited period of time, including the duration of this public health emergency; or (b) any closure of a specific location for a limited period of time, including the duration of this public health emergency.
